About

I am a recent graduate with a degree in Bachelor of Science in Information Technology and two years of hands-on experience as a Full Stack Developer. My expertise includes working with PHP, HTML, and the Laravel framework to build dynamic, user-friendly web applications. During my time in the field, I have successfully collaborated on projects that required both front-end and back-end development, showcasing my ability to deliver seamless, high-performance solutions. I am passionate about leveraging my skills to create innovative digital experiences and am excited to contribute to a forward-thinking team.
